

Job Announcement

Research Institute of Wildlife Ecology, Department of Interdisciplinary Life Sciences, University of Veterinary Medicine Vienna, Austria

PhD- Position in Cognition, Memory retention, and Ecology

Application deadline: 28.02.2021

A PhD position is available in Claudia Bieber and Thomas Ruf's research group at the Research Institute of Wildlife Ecology in Vienna, Austria (<https://www.vetmeduni.ac.at/fiwi/>).

This position is part of a new research project funded by the Austrian science fund FWF. Our research aims are to investigate the impact of hibernation on memory retention and cognition in edible dormice (*Glis glis*).

The PhD candidate will be responsible to hand-raise dormice and to train and test them prior and after hibernation in behavioural tests. Hibernation patterns will be experimentally manipulated and monitored via implanted bio-loggers. Besides the evaluation of these general experiments, the PhD-candidate is planned to focus on social recognition and social network analysis (evaluating e.g. automatically recorded RFID data).

Applicants should have an M.S. degree (or equivalent) and a background in behavioural biology, physiology, or ecology. Experience with modelling and programming is advantageous. Our lab places a strong emphasis on the use of modern applied statistics. Experience with small mammals is advantageous.

Job Details

Type of contract: PhD-positions for 4 years (1st April 2021 to 30th March 2025)

The salary is based on the guidelines of the FWF

(<https://www.fwf.ac.at/fileadmin/files/Dokumente/Personalkostensaetze/pek-2020-medizinerInnen.pdf>) and the Veterinary University of Vienna.

Contact Data

Formal applications should include the following as a single pdf file: (1) a CV with names and contact information of two referees, and (2) a letter of motivation (2 pages maximum).

Inquiries and applications should be directed to **Claudia Bieber**

(claudia.bieber@vetmeduni.ac.at).

The deadline for **applications is 28th February 2021**, the preferred starting date is the 1st of April 2021.

The Research Institute of Wildlife Biology (FIWI) is located in the Vienna Woods, at the periphery of Vienna, though only 30 min from the city centre, and is part of the Department of Interdisciplinary Life Sciences (University of Veterinary Medicine, Vienna). Both German and English are commonly spoken; German is useful but not required. The planned project is based on the collaboration with the Veterinary and Genetics groups of our department. Our research is supported by administrative, animal care, and IT staff. FIWI has many national and international collaborations, a high rate of third-party funding, and an excellent publication output.
